HOW TO MAKE A FLYTRAP

Get a soap box of large size. Substitute wire netting for the top and two sides. Cut a round hole in the bottom and insert in it a wire netting cone with a one-eighth-inch opening at the bottom and a half-inch opening at the top. Place a fish head or piece of food inside for bait. Elevate the trap a few inches from the ground so the flies may enter. When the trap is crowded kill the flies with boiling water.

Beware the Fly Fight Deadly Fly Made Easy

Pest Causes More Death Than
Do Murderers, Storms
and Poisons

DIRT HOME OF INSECT

If the house fly ever stops long enough in its busy career for self-pity, it must surely feel itself a victim of the oft-quoted fickleness of public opinion.

It is a deadly pest, but its career in the main from those of our fathers, husbands and brothers who possessed that attractive fly bait, a bald head. Otherwise it was so familiar a pest in every household that its presence attracted little or no attention. We used screens and sticky or liquid fly paper to keep down the population and save ourselves the irritation of the incessant buzz-buzz of a hot day, but that the fly represented any real menace to the household health was not imagined. Baby Bunting received humiliations on the fly's persecuting qualities, its marvelous wall-climbing prowess, and its general meekness of nature.

Then suddenly the scientific men began to find out things about the relationship of the insect world to certain prevalent diseases. Louise Fuller writes in the Pictorial Review. The mosquito became more than a disagreeable pest; it appeared as the transmittor of malarial germs. The tsetse fly and sleeping sickness, a particularly deadly and incurable plague, were found to be intimately associated with their labors. And the house fly, instead of a mildly annoying but harmless domestic animal, was unloading as a very enemy within our gates, purveying germs of filth and disease.

It used to be a popular custom to discover a use for every living creature, and the sanitarians tell us that the fly's principal value is as a danger signal, indicating the presence of dirt in some form. Wherever you find flies there is cleanup work to be done, and the community which disregards the warning will not be among those boasting of a low death rate.

Filles cannot live except in dirt; it is their natural habitat. A really well-brought-up fly as naturally prefers unclean odors as fastidious people prefer sweet ones. They are bred in garbage, manure or similar refuse; they derive their daily sustenance from it; and in due course they deposit their eggs in it, thus completing the cycle. When, then, a harmless-looking fly drops into your milk or cream pitcher, scrambles about a little and slowly crawls out again, he has brought a minute portion of the malarial germ to your breakfast table—nurse, but not so minute as the millions of germs which dwell in this same malarial, and which are transmitted with it.

Every summer, by just such means, the house fly kills more people in the United States of America than murder, storms, cyclones, mad dogs and poisonous reptiles, all combined. Not by direct methods, of course—the fly does not work that way—but by spreading the germs of typhoid and various other intestinal diseases. The baby is the fly's most helpless victim. As he lies sleeping in his crib, the fly crawls over his head and hands, his nursing bottle or teething ring, leaving germs in its wake to be absorbed into the child's system, not yet strong enough to throw off and counteract the disease.

If there are flies in your house or your neighbor's, you are creating danger for yourself and your household. The greater, buncher, barker and troubleshooter from whom you buy your food stuffs has flies in his shop, either withdraw your custom and deal in a shop where the food is protected under glass, or, if other conditions make it necessary, buy a fly trap.

Horticultural Advice

SLIGHT HOME FRUIT GARDEN

While No Less Important or Numerous They Are Overshadowed by Big Commercial Orchards.

With the growth of the commercial fruit interests of the United States the home fruit garden has been lost sight of. Only a few years ago the owners of home gardens not only led in the production of fruits, but were our authorities as to how and where to grow them. Today these gardens, while no less numerous or important, are overshadowed by the orchards where fruit is grown for commercial purposes.

Both the home garden and the orchard are essential to the good of the community, they bear very different relations to the fruit interests of the country as a whole. The home garden is always the forerunner of commercial development, and even in those localities where climatic and soil conditions are adverse to conducting such industries on an extensive scale the home fruit garden of the enthusiastic amateur is certain to be found. All the success attained today by the fruit interests of the United States has grown out of the persevering efforts of a few men whose home fruit gardens served not only as testing stations for determining the fitness of given sorts for new and untried localities, but they

A flytrap that is most effective in trapping flies may be made of a cylinder of screen wire inclosing a cone of screen wire says the United States department of agriculture in Farmers' Bulletin 724, "Fruit Growing in the Ozarks." The trap may be made at home easily and consists of a screen cylinder 24 inches high and 18 inches in diameter. The screen is nailed to barrel hoops at the top and bottom. Four laths are nailed to the hoops as vertical pieces to make the trap rigid. At the bottom the legs project an inch below the hoop.

The cone is inserted in the bottom of the cylinder, being tacked to the bottom hoop. The cone is 18 inches in diameter at the base and one inch in diameter at the apex, or top. It is 22 inches high. The edges of the cone are soldered or sewed together with wire. The top of the trap is made of a barrel head, in which a hole 10 inches square is cut and a screen door put in.

State beer is the best fly bait, says the bulletin. Milk, or milk mixed with mashed overripe bananas, or one part of black-strap molasses and three parts water, or one part brown sugar, make good baits. The sirup mixtures should be put in large, shallow pans and placed under the traps. Where one bait attracts many honey bees another bait should be used.

Put traps in places where the flies naturally congregate, the sunny side of a building out of the wind. Keep bait containers well filled. This gives larger catches and avoids the danger of flies breeding in the bait. Empty traps regularly. Kill the flies with hot water.

A sticky fly paper that may be used in the house is composed of two pounds of rosin and one pint of castor oil, heated together until it looks like molasses and spread with a paint brush on any kind of paper while the mixture is hot.

This bulletin on flies is free upon application to the department of agriculture, Washington, D. C., and contains other forms of traps for various purposes. The department also has a list of bulletins available for distribution on insects that are household pests. The list contains:

Remedies and Prevention Against Mosquitoes. (Farmers' Bulletin 444.) Some facts About Malaria. (Farmers' Bulletin 450.) Sanitary Privy. (Farmers' Bulletin 463.)

Yellow Fever Mosquito. (Farmers' Bulletin 547.) Carpet Beetle, or "Buffalo Moth." (Farmers' Bulletin 626.) House Centipede. (Farmers' Bulletin 627.) Cockroaches. (Farmers' Bulletin 636.) House Flies. (Farmers' Bulletin 679.)

Silverfish: an Injurious Household Insect. (Farmers' Bulletin 681.) Fleas as Pests to Man and Animals, With Suggestions for Their Control. (Farmers' Bulletin 683.)

Hydrochloric-acid Gas. Against Household Insects. (Farmers' Bulletin 699.)

Home Aids: Kinds and Methods of Control. (Farmers' Bulletin 769.) After-dinner Habit of House Fly Larvae as Indicating a Favorable Remedy Measure. An Account of Progress. (Department Bulletin 14.)

A Maggot Trap in Practical Use: An Application of the House Fly Control Department Bulletin 704.

First-aid for Insect Bites.

OVER THE WIRE

A Telegraph Operator's Story

By WARREN MILLER

There is no more favorable opportunity for young people of opposite sexes to poke fun at each other than over a telephone or telegraph wire. There is a fascination in operating from behind a shield rendering one invisible. A girl will delight to say things to a man who can't see her and doesn't know who she is. I was a telegraph operator when a young man, and I noticed this disposition in many a girl operator with whom I talked over the wire. I am a matter of fact sort of a fellow myself and doubt if it would ever have occurred to me to bamboozle a girl. This fashion had not the girl shown a disposition to bamboozle me.

She who first tried it was an operator at a station about twenty miles away from me. I was in the town of M., while the girl was out at G., a way station some twenty miles distant in the country. She had more time on her hands than I, and I suppose this is what set her on to quizzing me. She started in one night about 10 o'clock after having taken a message from me beginning by asking me what was going on in town, how I liked M.; if there was any fun going on there and expressing her dislike of being compelled to live in a little way station like G. From this we got talking about ourselves and native boy, as persons of opposite sex at that age invariably do, finally drifting to love and marriage. From love and marriage in general we dropped into specialties, at last narrowing the topic down to our selves.

The girl led me along in the channel she laid out herself till I admitted that, marriage being a lottery, I would about as well marry a girl I had no knowledge of as one I had met and loved. All I required was to know that the girl was to marry possibly a fair amount of good looks. One thing led to another till it was arranged that she should make the next day a call and I should send her mine. Then if we were mutually pleased we might proceed further toward forming acquaintance with a view to matrimony.

The next day I looked over my stock

of photographs—not of myself, but of my friends—and, selecting one of Sam Atkins, the best looking fellow in the lot, I sent it to the girl. Sam was off at the Spanish-American war at the time, and I trusted to his getting shot or dying of disease so that I might not get into trouble by passing him off for myself. In return I received a picture of a rather pretty girl who I judged from her features was full of mischief, the very one to get up just such a complication as we were entering upon. Upon her lips was an engaging smile and in her eyes a very saucy look.

After that the wires began to warm up with our conversations, till at last they came to a white heat with love passages. When we had fired a lot of such missiles at each other we began to talk about meeting. At my proposal to go to see her she cooled down a bit, and it was easy to see that her exuberance was the result of getting behind a masked battery. I made several propositions to go to see her on a certain day and hour, but for every time I set her a reason why it would be inconvenient or impossible for her to receive me. At last it occurred to me to go up and look her over without an appointment. Never having seen me, she wouldn't know me.

So one day, having secured a leave, I started to see my charmer. On arrival I walked up into the village and on the street met my girl, whom I recognized at once by her photograph. I followed her into several shops and finally to a yellow house that stood back from the street. She went into the house, and, having waited half an hour for her to come out, I concluded she lived there.

I knew a man in the place, Tom Foster, and, hunting him up, told him that there was a girl in the town I wished to know.

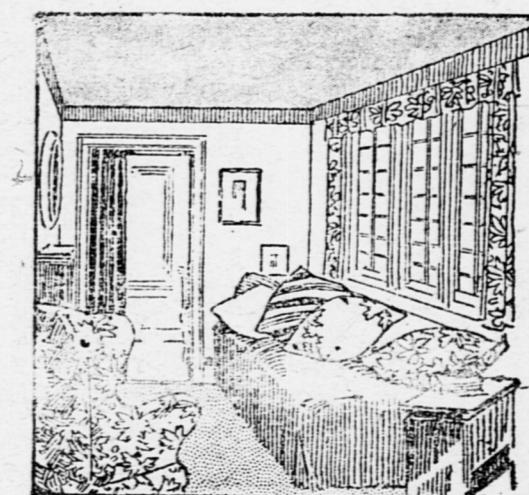

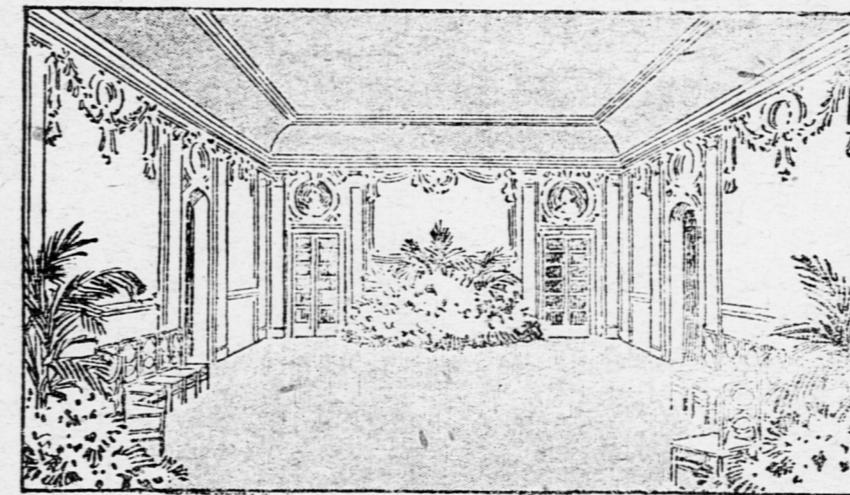

He said there was going to be a dance that evening and all the girls in the place would be there. He would take me with him, and if he knew the girl I wished to meet he would introduce me. I thought that an excellent plan since it would give me the advantage of keeping my affairs to myself. I could obtain an introduction to different girls without my introducer knowing the one I was especially interested in.

Melt the resin and cut the beeswax into small pieces. When the resin is melted, add the wax to it, and after the wax is melted, add the charcoal and stir thoroughly. When the charcoal has been thoroughly mixed with the resin and beeswax, take from the stove and add the linseed oil. When this mixture cools it is a hard black cake.

For use in the orchard a piece large enough for the amount of grafting to be done should be cut from the cake and melted by heat. If the weather is cold or if there is a large amount of grafting to be done, the grafting wax can be kept soft by putting the cake in a pan. The wax should be applied by means of a brush.

This is a very good wax for grafting purposes, as it will thoroughly seal the wounds and does not soften during hot weather.

The Victor system of changeable needles enables you to meet every acoustic condition

A "fixed point" can't be perfect for all conditions! If it is perfect for the ball-room it won't be perfect in the den.

If it's perfect in the den it will be inadequate in the ball-room. If it's perfect for one music-room it will not be perfect for another music-room which is different in size, acoustic properties and furnishings.

Consequently changeable needles are best, because—in no other way can reproduced music be perfectly suited to every home and to any room in that home without in the least degree changing the artist's interpretation. That can be done only with the Victrola because of the changeable needles. It can not be done by any sound reproducing instrument which is unable to adapt itself to its own particular surroundings.

There are Victrolas in great variety of styles from \$15 to \$300—easy terms if desired. Come in and we'll gladly play any music you wish to hear and demonstrate the advantages of the Victor system of changeable needles.

A New Model Typewriter!

No. 9 OLIVER

The Standard Visible Writer

BUY IT NOW?

Yes, the crowning typewriter triumph is here!

It is just out—and comes years before experts expected it. For makers have striven a life-time to attain this ideal machine, and Oliver has won again, as we scored when we gave the world its first visible writing.

There is truly no other typewriter on earth like this new Oliver "9." Think of a touch so light that the tread of a kitten will run the keys!

CAUTION!

The new-day advances that come along on this machine are all controlled by Oliver. Even our previous models—famous in their day—never had the Optional Duplex Shift.

It puts the whole control of 84 letters and characters in the little fingers of the right and left hands. And it lets you write them all with only 28 keys, the least to operate of any standard typewriter made.

Thus writers of all other machines can immediately run the Oliver Number "9" with more speed and greater ease.

WARNING!

This brilliant new Oliver comes at the old-time price. It costs no more than lesser makes—now out of date when compared with this new discovery.

For while the Oliver's splendid new features are costly—we have equalized the added expense to us by simplifying construction.

Resolve right now to see this great achievement before you spend a dollar for any typewriter. If you are using some other make you will want to see how much more this one does.

If you are using an Oliver, it naturally follows that you want the finest model.

17 CENTS A DAY!

Remember this brand-new Oliver "9" is the greatest value ever given in a typewriter. It has all our previous special inventions—visible writing, automatic spacer and 1-2 ounce touch—plus the Optional Duplex Shift, Selective Color Attachment and these other new-day features.

Yet we have decided to sell it to everyone everywhere on our famous payment plan—17 cents a day! Now every user can easily afford to have the world's crack visible

For Congress.
We are authorized to announce MARY HENRY H. DUNHAME of Warren, candidate for Congress from the Third Congressional district, subject to the action of the Democratic primary to be held in August, 1918.

Our Country! In her intercourse with foreign nations may she always be in the right; but our country, right or wrong.
—Stephen Decatur.

SUBMARINES are now the keystone to Germany's arch of military strength, that arch being upside down, as is the entire institution of autocracy.

SPARING the old tin can and the abandoned bottle will help the great American landscape very much. Thus also will the war bring a blessing in its train.

BEING strafed by tornadoes is not a pleasant experience, as they have a higher degree of efficiency than Zeppelins.

WAR is teaching the people of France the great desirability of outdoor life, which is a lesson eminently worth learning by anybody.

VACANT lots should be cultivated because millions of hungry mouths demand it. The saving of money to the individual consumer is incidental to the larger process.

EVEN though we have the ships, the men and the money, too, according to the old jingo song, it is necessary to destroy the submarines before we can use the other resources.

ONLY those who have a wide streak of yellow in their composition and those who are flirting with treason now repeat that foul lie to the effect that America entered war for financial reasons.

How much pleasanter to buy an American liberty bond than to help pay the enormous indemnity that Prussia would demand if it should manage to beat down the opposition to its far reaching plans!

SOME folks are pacifists because of their mistaken love of peace, believing themselves more humane than those persons who believe in fighting is necessary, but quite a good many clamor for premature peace because personally they are not willing to pay the price of liberty and progress.

A DEMOCRACY goes in debt to itself to wage a war for its own benefit; an autocracy fastens a debt upon the people to wage war further to enslave the people. The people of a democracy share the burdens and the profits of a war; the people in an autocracy have all the burdens and none of the benefits—if any.

GARDEN workers may well bear in mind that in all the history of this land of plenty the present crisis is unique. For two years and more an increasing part of the world's population has been going hungry, but the bad crops of last summer and the injury to the wintry wheat during the months recently past have just now brought home to Americans the hard fact that food is scarce. Not all Americans realize it yet. If they did, every vacant lot would be under cultivation this spring.

The government is proposing a 5 per cent. war revenue tax on talking machines and records, so prospective buyers should get in and save this now.

Registration Develops Wonders.

Some wonderful men were discovered in the registration Tuesday. Men who never helped anybody, but themselves, claimed exemption from military service on the grounds that they had relatives solely dependent on them, and many a man will go marked through the world on account of his false and cowardly responses to the questions asked in his registration papers.

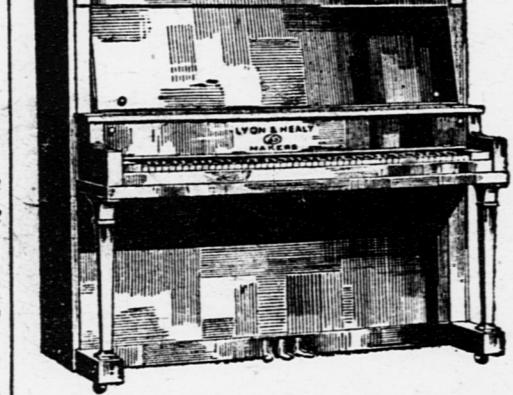

Roark has ordered from the factory another gross of rubber fly swatters, and if the flies don't find it out and leave the country, you will need them.

Another Chautauqua calls strong for still another. Let the good work go on.

Miss Ethel Rose has returned from Nashville, where she has been for the past several months, and has completed her studies in a commercial course. She will be here for the present, at least.

In self defense, and for the protection of the public, use a rubber fly swatter.

Protection for Prospective Piano Purchasers.

We have some information which every prospective piano buyer should know. Piano prices and qualities are two vital things which few buyers know, and which many sellers conceal, if they know. We shall be glad to help you, and will do so, even if we do not sell you.

The J. L. Roark Estate.

Billiousness.

The word "billiousness" has had varying fortune in the language of medicine. At one time it was used to define indisposition of peculiar character, and at another physicians rejected it because they believed that it implied a wrong cause for the condition in question. Although the pendulum is swinging back in favor of a judicious use of the word, the latest medical dictionary cautiously defines it as "a minor ailment, thought to depend upon a slight disturbance of the hepatic functions."

Whether properly named or not, however, the condition certainly exists, and it is quite probable that the liver, whether or not it is primarily at fault, is often concerned in the digestive upset. The functions of the liver are manifold: it secretes bile, stores up sugar, and destroys many poisons, either derived from without the body or formed in it, especially some of the waste products of digestion, which it converts into urea. If any of these functions become deranged, the system suffers. If something interferes with the secretion of bile or with its passage into the intestine, the symptoms of jaundice appear. If the liver is unable to store up sugar, diabetes results. If it cannot destroy the poisons that are taken into the body that are accidentally formed in it, an indisposition or actual illness follows.

When we speak of a "sluggish liver" we mean that the organ is unable to dispose of all the poisonous waste products that occur in the system. The result is that acute form of autointoxication which we call a billious attack. The symptoms are headache, dizziness, spots or zigzag figures before the eyes, irritability and depression, indigestion, uneasiness and perhaps vomiting, and often a pasty complexion and a yellow tinge to the whites of the eyes.

Associated with those symptoms, or preceding them, there is constipation or irregularity of the bowels. And that is no doubt the cause of the whole trouble: The intestines are slow in disposing of the waste products of nutrition, and so a larger amount of poisonous material is carried to the liver than that organ can easily dispose of. Some of it therefore enters the blood stream and causes an attack of billiousness. That checks the appetite; fewer waste products form, and thus the body rids itself of the excess already present. When an equilibrium is restored the "billious attack" is cured.

Registration Develops Wonders.
Some wonderful men were discovered in the registration Tuesday. Men who never helped anybody, but themselves, claimed exemption from military service on the grounds that they had relatives solely dependent on them, and many a man will go marked through the world on account of his false and cowardly responses to the questions asked in his registration papers.

Pointed Paragraphs.

If you play with the devil you lose.

Some people are always up and doing—other people.

Women admire a brave man and love an audacious one.

He is truly wise who gains wisdom at the expense of others.

If you would succeed in life, learn to know what you can't do.

One rich lawyer is a monument to many fools and obstinate men.

Men admire a handsome man when he has good sense—but they usually suspect that he hasn't.

After a woman reaches the age of 40 it is impossible to convince her that the good all die young.

After a man reaches the age of 40 he quits trying to secure the moon and gives his entire attention to getting the earth.

Many a man whose marriage was the result of love at first sight wishes that he had been blessed with second sight.

The Victrola reflects music, philosophy and art. Hear its wonderful capacity at Roark's.

They Couldn't Fool Caruso.

Caruso has won world recognition by ten years' public appearance before he had his voice permanently recorded. He and scores more of the world's greatest artists in all lines are vastly more interested in how their talents will be presented to the millions of talking machine users and untold millions of hearers for all time to come, than any individual possibly could be in listening to them. They came from all quarters of the world to America, seeking the Victrola as the supreme vehicle—so why should you make a mistake by buying any other instrument! Accept the judgment of the greatest artists and keenest critics the world contains. Drop in at Roark's, any time, and see and hear why the Victrola is in such universal demand, the world over, that production has never reached a point to supply it, though millions of dollars are spent annually for buildings and machinery.

Serving Mankind.

In his Memorial day address at Arlington cemetery President Wilson again alluded to a theme that has illuminated other addresses given by him in recent weeks. "In the providence of God," he said, "America once more has an opportunity to show to the world that she was born to serve mankind." It is well that the nation's chief executive keeps this great fact in mind and brings it to public attention from time to time.

There is a strong tendency on the part of some persons, particularly those influenced by agencies which endeavor to advance sinister purposes, to ignore the element of service and to insinuate that the country is being manipulated by interests which desire war "for what there is in it." The best answer to this poisonous insinuation is found in a simple analysis of the facts.

The worldwide crisis is very real and very perilous. Americans who fail to recognize this are singularly blind to the outstanding lessons of the war. The present life and death struggle for human rights against the remorseless forces of organized tyranny is unmistakably necessary if the world is to gain a just and lasting peace and if the peoples of the world are to have the right henceforth rule themselves.

Intelligent care of the outer premises will do more to destroy the fly than all the work that may be done by swatting. In fact, if everyone would observe sanitary rules, there would be no flies to fight and destroy us.

Among the many good impulses aroused and fostered by the Chautauqua is patriotism, for the Muhlenberg Chautauqua Association has purchased \$300 in "Liberty Bonds" with its surplus fund.

I have a thoroughbred buffalo Jersey male, service, \$1. Also have the silver lace Wyandotte, eggs 75c per setting. 4t. Curg Wright.

Victor tungsten needles can be had from Roark. First time for a year this announcement could be made, but the factory is catching up with the demand.

Patriotic music in plenty at Roark's.

The Battle Call.

When battle steeds are prancing, and brave men are advancing to knock the foeman silly, will you be there, oh, Willie?

Big, strong and double fisted, why haven't you enlisted?

You should require no urging; from craven sloth emerging, you should, in warlike manner, be marching 'neath the banner, a shotgun on your shoulder, before you're one day older.

Yours cheap and lame excuses aren't worth a pair of deuces.

What if a German kills you?

What if a Prussian drills you?

If you should be a goner, we'll bury you with honor, and fire a parting volley o'er one who perished bravely.

You'll live in song and story, and have all kinds of glory, and you'll look down from Aiden, with harps and white wings laden, and say, "I am glad I perished, to be thus praised and cherished!"

But if you slink and tremble, when fighting men assemble, and do some poor explaining why you're at home remaining, you'll find that shame is near you.

The world will frown and jeer you.

Big, strong and double fisted, why haven't you enlisted?

Walt Mason.

The furniture will be glad if you give it a dressing of Roark's furniture polish.

Weather Forecast for the Week.

Forecast for the week beginning Sunday June 3, 1917—For Ohio Valley and Tennessee: Generally fair with temperature near seasonal normal.

Whatever you may want in window shades can be had at Roark's.

I have a No. 8 Victrola and sixty double disc records which I offer at \$55. Guaranteed in first-class condition. Call 363 for information. J. W. Dawson.

Mrs. Osie Richardson died at her home at Hillside Sunday evening after an illness of some length following an attack of the grip. She is survived by her husband and four children. Burial was at the Eaves graveyard Monday afternoon.

Members of the Kentucky Press Association will assemble in annual meeting next week

All the way from Paris

just to sing for the Victor—then right back again. That's a trip Journeet made expressly to sing with Caruso and Farrar the Trio from Faust on the Victor.

Was it worth all that trouble and expense? Come in and hear the record and see if you don't say "Yes".

K. C. C. LOCAL TIME CARD.

Card of Thanks.

We wish to take this method of expressing our heartfelt thanks and gratitude to the many kind friends for loving help and sympathy extended through the weeks of care and anxiety during the affliction of a loving husband and brother, Rev. W. C. Hayes. Also to Miss Ada Richey for her untiring, patient, gentle service and attention through his last weeks. Mary E. Hayes and his Brother and Sisters.

See the \$100 Victrola.

Although we are in a great world war, don't forget that the fly destroys more lives than any other one agency.

Some folks predicted that there would be some trouble in this country over the registration for war service. They had listened to loud talk from a few people. But trouble did not show up. In fact, it is said that some of the loudest kickers were so quiet when they came to register that they had to be fanned, for fear they would faint.

Margaret K. Colvin.

Registration day brought a large crowd here Tuesday.

Dry Fruit for Winter Use.

The U. S. Government has issued a special bulletin strongly advising people everywhere to dry fruit of all kinds, as there is little trouble in the operation, no losses result, as in canning, and the expense for sugar can be cut down vastly, as only sweetening need be used as the fruit is used, and always at a time when sugar is cheapest, in the winter months. This practice has been dropped to a great degree, people depending on canned and evaporated fruits, at a great increase in the cost of living.

This is a great avenue for saving, and insures a full supply of this valuable food, which occasionally becomes scarce, or is cornered by large interest, and the price is almost prohibitive.

Buying Liberty Bonds will insure our liberty.

Growlers will be given small heed in these times of need. Do your bit or keep your lip.

See the most practical fly-swatter on the market; made of rubber and will last for years; will not damage lace curtains or the finest furniture, but is sure death to the fly. Can be washed and kept sanitary, and is the practical and ideal little implement in good housekeeping. Price is only 10 cents. At Roark's.

We are now beginning to feel that we are real Chautauquans, and there would be general regret if the announcement were made that we should not have one next summer. But we are to have the biggest one yet.

Roark has the only sanitary fly-swatter ever made.

See the line of talking machines at Roark's, and select the instrument you wish.

Fight the fly, or he may whip you.

Begin now, not a bit too soon, to get ready for our next Chautauqua.

LINCOLN CHAUTAUQUA

The Five Day Program Was One of Excellence and Variety, Delighting Large Audiences Daily

CONTRACT MADE FOR NEXT YEAR

People of this section have just had a season of extreme delight and general refreshing from the splendid program provided by the Lincoln Chautauqua association, and from the start last Thursday by inimitable Col. Booth Lowrey until the close Monday night by the matchless Ira Landrith, there was strength, purity, variety for all tastes. Weather conditions were extremely unfavorable, the tent went down early Friday morning, but the court house was used, and everybody felt so thankful that we had missed dire disasters which had befallen so many wide areas that the Chautauqua spirit was strong and general. Mr. Holmberg the platform manager is a man of the right type, and he joined the tent crew in its work, and by Saturday night the tent was again in commission. Every number received hearty approval of the audience, and is worthy of special mention. The musical attractions were all strong, the Brooke band of course carrying the banner. Reno Welbourn gave a lecture and scientific demonstration which pleased and enlightened. Mrs. Helen Pauslen made two addresses generally recognized as the strongest ever delivered here by a woman. Sunday afternoon and night increased audiences enjoyed the free privileges extended and were aroused in the afternoon by Arthur Kachel in his presentation of "The Music Master," and at night he gave "The Melting Pot." He is an artist of highest rank, and there has never been such matchless work done here as he delivered. Folks who had made the remark that the program was short on lectures forgot all about it when Rev. Ira Landrith had delivered his first lecture Monday afternoon, and again at night he heaped the measure to overflowing, for there have never been presented two more vital messages to our people.

Miss Alexander, in charge of the Junior Chautauqua, did splendid service with the children, and they all think this the greatest Chautauqua we ever had, for this is the first time we have had this important department. In response to a general demand, the Muhlenberg Chautauqua Association contracted for next year, and as it is the rule with the Lincoln to build a stronger program each season, the people of the country may prepare for an even greater session in 1918.

Don't fight the flies so strong and long that you neglect the weeds. They are developing rapidly and need curbing.

Every man who registered is interested that his brother entitled shall also do his bit, and slacker is in a hard row for stumps.

Buy the instrument, the greatest artists of the world select to reproduce their supreme efforts. You can't fool them, and they select the Victrola. Let Roark demonstrate and explain the superior qualities.

Fight the fly. Roark has the most effective weapon ever invented.

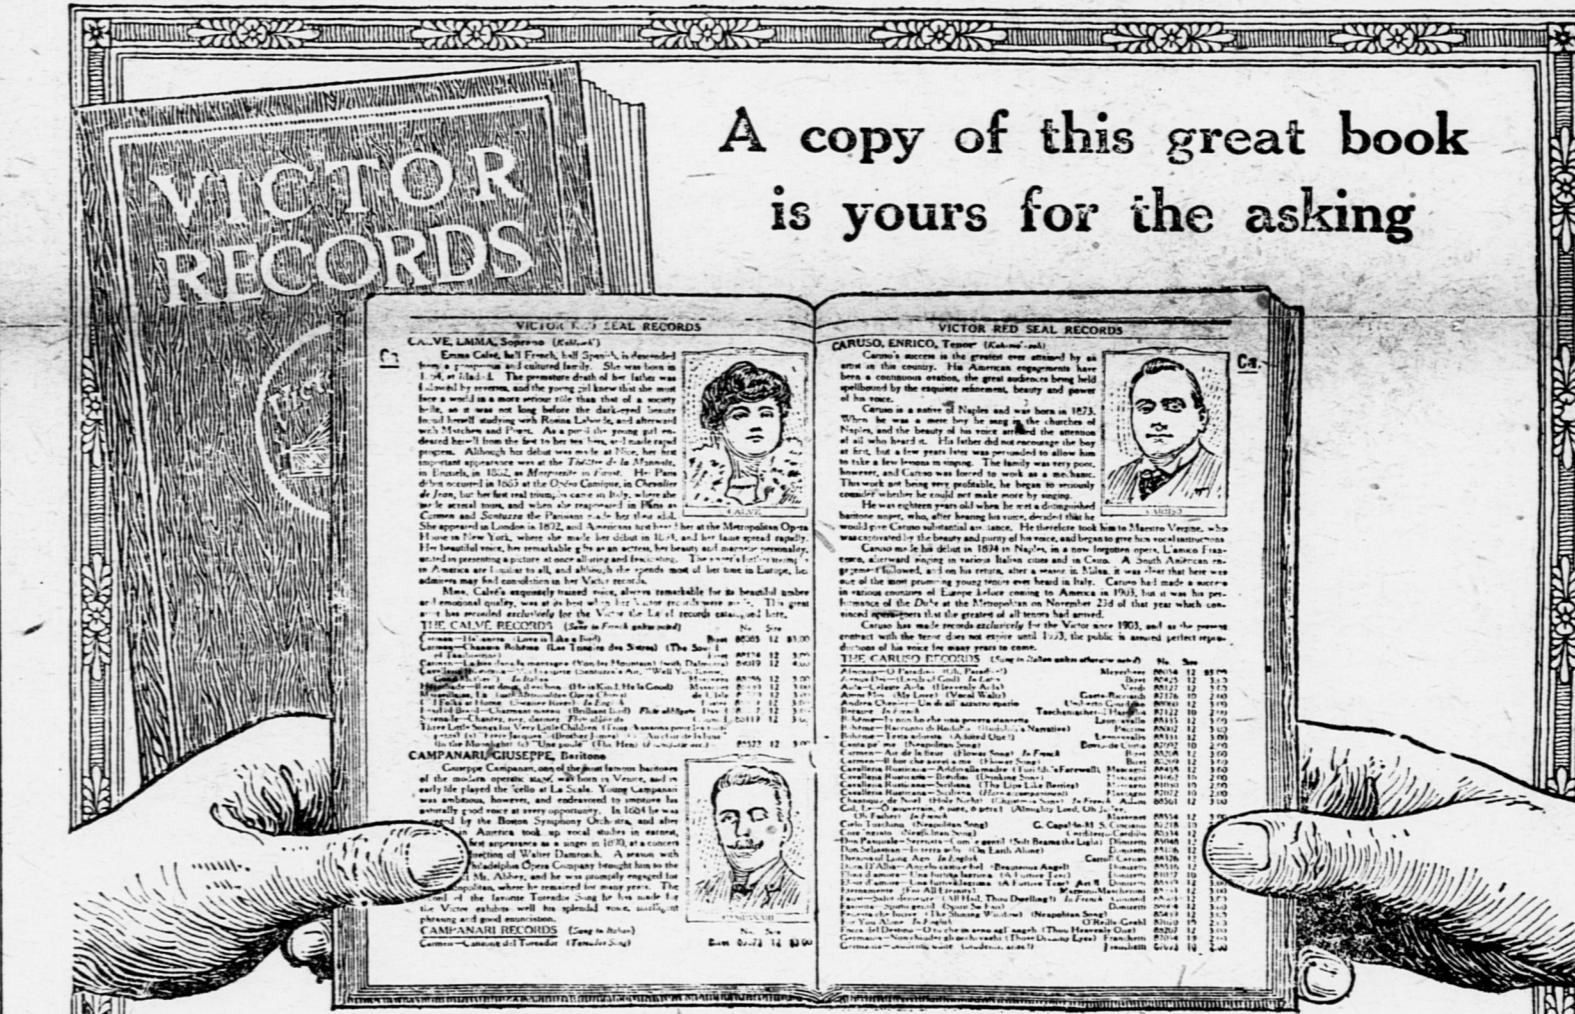

Miss Clarissa Harrold, Interpreter of Plays, Who Will Be Heard Here at the Chautauqua

MISS CLARISSA HARROLD, Interpreter of plays, is to appear here at the Redpath Chautauqua on the second day. Her interpretations are faithful reproductions of the characters as their creators conceived them. Her portrayal of the various roles, with their altogether distinct mannerisms, is so startlingly true to type as to be almost uncanny at times.

Her rendition of "Wind Tossed Sails" will be one of the great features of the forthcoming Chautauqua program.

Redpath Chautauqua, Central City, Ky., June 28-July 3

A copy of this great book is yours for the asking

The Victor Record Catalog is the most complete catalog of music in the world

It is the recognized authoritative index to the world's best music, to the greatest musical achievement of all time.

It has required nineteen years of constant research, of tireless effort, and the expenditure of eleven million dollars to place this catalog in your hands.

Its 506 pages tell you not only all the music that the Victrola brings to your home, but give you a wealth of interesting information about all the great artists who make records for the Victor exclusively, and about operas, composers and musical history.

Through each and every page runs the story and proof of Victor Supremacy. Each and every page is a reason why the Victrola should be in every home.

If you are a music-lover, you should call on us for your copy of this great book, whether or not you have a Victrola in your home.
